1. The Examiner has carefully considered Applicant's Response of 3/11/05. The Examiner has reconsidered the construction of Claim 1, and particularly in light of the amendments, believes a rejection directed at ambiguous language of Claim 1 is proper. The Examiner finds that the language of Claim 1 allows for the meaning of the base material to be both the manganese peroxide and the activator. This ambiguity is clarified in claim 10, and also in the disclosure of the Specification. The Examiner also finds the limitation of the term "obtained from" unclear. The Examiner makes the following recommendation to the language of Claim 1.

--A welding flux for use in welding stainless steel parts, the welding flux consisting essentially of over 70wt% manganese peroxide (MnO_2), and at least one activator selected from a material group that includes zinc oxide (ZnO), silicon dioxide (SiO_2), chromium oxide (CrO_2), titanium dioxide (TiO_2), molybdenum dioxide (MoO_2), and iron oxide (Fe_2O_2).--

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 3, 4 and 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 contains the term "obtained from" which limitation of is unclear. Additionally, the limitation of the base material to manganese peroxide is unclear.
